

**the virtual electromagnetic interaction between digital ...** - on the presentation of the virtual edge current in images, and also the study of virtual electromagnetic interaction between two related images inspired by electromagnetism. the edge current in images is proposed **image analysis inspired by - wseas** - image analysis inspired by physical electro-magnetic fields published by wseas press ... which reveal the structure properties of the image by electro-magnetics inspired transforms. in these transforms, the formulas in electro-magnetic theory are adjusted to more generalized forms in order to suit practical image analysis tasks, and some novel viewpoints which take the image as a virtual field ... **advances in image analysis - nature inspired methodology** - imitating the physical fields derived from the static charges and static current distribution. the edge vector the edge vector field is also presented, and the virtual magnetic field generate by it is also investigated. **high frequency, high current density voltage regulators** - integrated magnetics. the transformer then becomes an integrated magnetic with distributed the transformer then becomes an integrated magnetic with distributed windings, which is preferred in high current applications. **uav power component--dc brushless motor design with ...** - pigeon-inspired optimization xiaobin xu and yimin deng state key laboratory of virtual reality technology and systems, school of automation science and electrical engineering, beihang university, beijing 100083, china as a widely used power component of unmanned aerial vehicle, the direct current (dc) brushless motor has the prominent advantages of high efficiency, long period, low noise, and ... **cyber space and virtual reality ozan adam, bahcesehir ...** - control science, a forerunner to current information theory and computer science. through its electro-magnetic through its electro-magnetic nature, cyberspace integrates a number of capabilities (sensors, signals, connections, transmissions, processors, **ieee sensors journal, vol. 17, no. 6, march 15, 2017 1937 ...** - such as robotics, virtual reality, and rehabilitation. to date, various techniques have been proposed for tracking hand movements, but the majority suffer from poor accuracy and repeatability. inspired by the articulated structure of finger joints, we propose a novel 3-d printed optical sensor with a compact hinged configuration for tracking finger flexion. this sensor exploits malus ... **available online at: ijarcsse a comparison ...** - magnetics, and motor drive system studies. powersim develops and markets leading simulation and design tools for research and product development in power supplies, motor drives and power conversion and control systems. spice is an acronym for simulation program with integrated circuit emphasis and was inspired by the need to accurately model devices used in integrated circuit design. it has ...
